

**New****ROKK wireless SUB watertight charger with integrated invisible charging - 3-coil 15W****IPX6**

For indoor and outdoor installation on any non-metal surface (fiberglass, leather, PVC, fabric, wood, carbon fibre, etc.)  
 SUB is designed to be covered with a material such as leather, fabric, or foam covering for a customised installation.  
 IPX6 watertight. Compatible with any mobile phone with a non-metal case and 3-mm minimum thickness.  
 Qi wireless charge technology (Apple, Samsung, Huawei, etc).  
 The SUB charger features 3-coil technology that ensures a charging area over 80% larger than previous versions.  
 This implementation is the best one for mobiles with very powerful camera phones (15 W output power).
