

GLOMEX Mars 4 Skew NEO satellite TV antenna

Mars 4 Skew NEO in the new FULL-HD/4K TV wireless-operated satellite antenna with automatic SKEW, 60-cm dish, for max 16 outputs at a time.

Like all Glomex "NEO" satellite TV antennas, Mars 4 Skew is equipped with a super-fast satellite locking system even under extreme rough sea conditions, thanks to next-generation electronics and renewed mechanics: more powerful processor, faster driver, and stronger structure. Moreover, the new electronics have been designed to have extremely quiet satellite TV antennas, both in the search for the satellite and in tracking.

The new NEO satellite TV antennas have a standard GPS sensor and antenna for storage of previous navigation routes and high performance signal reception even at the borders of the coverage areas.

Mars 4 Skew NEO is operated by the free Glomex SAT TV App compatible with iOS and Android devices. Download the App and connect via Bluetooth® to the NEO sat antenna and a single click will allow you to:

- Update the antenna,
- Update the satellite list of the antenna,
- Select and change satellites,
- Send the operating parameters of the antenna to technical support if necessary.

DVB-S2 FULL HD

▲ 29.929.00

▲ Active multiswitch with 4 H/V outputs INCLUDED

▲ Synthetic rubber anti-vibration seal INCLUDED

▲ Coaxial cable RG6/75 ohm antenna connection unit and cable connection to decoder INCLUDED

▲ Control unit 12/24 V INCLUDED

| Code | Antenna disk diameter mm | Dimensions Radome mm | kg | Tracking rate | Average gain | Dish type | Frequency range | Supply | Full elevation range | Type of stabilization | Min EIRP | Control unit |
|-----------|--------------------------|----------------------|------|---------------|--------------|-------------------|--------------------------------|------------------|----------------------|---------------------------|----------|-----------------------------|
| 29.923.62 | 600 | 660x660 | 15.5 | 50°/sec | 36.5 dB | prime focus + HPD | 10.7 - 12.75 GHz LNB universal | 12-24 Vdc (3 Ah) | 5° - 90° | gyro on 2 axes + 3rd axis | 47 dBW | 3 satellites + endless list |

29.929.00 Optional stainless steel support with variable tilt

GLOMEX spare radome

To be combined with existing antennas for better design or as new cover.

| Code | ↔ mm | For antennas | |
|-----------|---------|--------------|-----------|
| | | Glomex | Osculati |
| 29.923.90 | 500x560 | Rhea | 29.923.41 |
| 29.923.91 | 660x660 | Mars | 29.923.61 |
| 29.923.92 | 500x560 | Saturn | 29.923.51 |

Tilting stainless steel support for GLOMEX TV antennas

Code 29.923.95

Electro-polished stainless steel support for satellite and directional TV antennas. For perfectly vertical position of the antenna when the mounting surface isn't perfectly horizontal. 0 to 5° tilting ray. It comes with 2 rubber gaskets.
