

EasyUp built-in telescopic ladder with railings

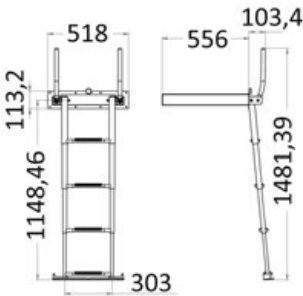

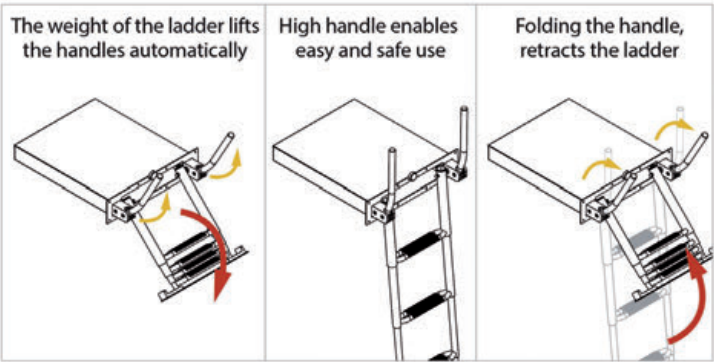

REGISTERED DESIGN / DISEGNO DEPOSITATO

AUTOMATIC HANDLE

Telescopic ladder recessed in stainless steel AISI316 with 4 steps. Equipped with integrated ascent handles that automatically raise and lower by rotating the ladder. The railing closing system makes it easier to retrieve the ladder from the gangplank. The ladder has a guided pull-out system for better and more precise sliding.

| Code      | Steps | Tube Ø mm   | Length mm |        | Max width mm | Closed height mm |
|-----------|-------|-------------|-----------|--------|--------------|------------------|
|           |       |             | open      | closed |              |                  |
| 49.569.04 | 4     | 19/25/32/38 | 1481      | 556    | 518          | 113.2            |

ATTWOOD retractable stern ladders

Designed to integrate into the stern platforms with a negative 15° tilt, they are completely hidden from view when closed. The only visible element is a simple faceplate with integrated locking and release mechanism. The ladder opens instantly and easily with one hand, both onboard and in the water. Once removed from the storage tube, the sturdy molded plastic steps automatically fold back, creating a convenient and safe ascent system.

| Code      | Attwood model | Steps | Length when open mm |
|-----------|---------------|-------|---------------------|
| 49.567.00 | 19902-34      | 3     | 737                 |
| 49.567.01 | 19902-44      | 4     | 987                 |
